Sensor Electronic Technology, Inc. Appoints New President and CEO

Emmanuel Lakios brings over 30 years of experience to UV LED Specialist

Columbia, SC – Sensor Electronics Technology Inc, SETi, world leader in UV LED located in Columbia SC, announced today that Emmanuel Lakios has joined the company as President and CEO.

Mr. Lakios joins SETi with 30 years of technology and business management experience. Prior to joining SETi he held positions as President and COO of Imago Scientific Instruments and 20 years at Veeco Instruments Inc. where he held various senior management positions including President & General Manager of Process Equipment & President of Field Operations.

In his new role, Emmanuel will build upon the existing technical excellence and organization and will coordinate all company activities.

Emmanuel brings a strong track record in technology management, strategic market development, and operational performance. Mr. Lakios has over 30 years of experience in Semiconductor and equipment industry.

"SETi has a great opportunity for growth with its leading edge DUV LED technology" commented Mr. Lakios. "New applications for this class of LEDs emerge daily. Our mission is to maintain our technical leadership and product position, addressing the requirements of the marketplaces we serve.
